

Poovarasan Arumugam

Full Stack Developer

poovarasanarumugam1030@gmail.com | +91 9500276714 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Professional Summary

Full Stack Developer with ~2 years of experience shipping production-grade web and mobile applications — solo, end-to-end, from architecture to Play Store. Delivered 8+ live products spanning fintech dashboards, healthcare booking platforms, multi-vendor mobile ecosystems, and enterprise SaaS. Proficient in React.js, Next.js, Flutter, Node.js, and MongoDB. Known for turning complex requirements into clean, scalable systems with zero hand-holding.

Technical Skills

Frontend: React.js, Next.js, JavaScript (ES2022+), TypeScript, HTML5, CSS3, Tailwind CSS, Framer Motion

Backend: Node.js, Express.js, REST APIs, JWT Auth, Razorpay/Payment APIs, WhatsApp Cloud API

Mobile: Flutter, Android Build & Signing, Google Play Store Publishing & Release Management

Database: MongoDB, Aggregation Pipelines, Schema Design, Indexing

Tools & Infra: Git, GitHub, Firebase, Cloudinary, Postman, Vercel, Netlify, VS Code

Professional Experience

Software Engineer | Xlorit Innovations Pvt Ltd, Coimbatore

Jul 2024 – Present

React.js · Next.js · Node.js · MongoDB · Flutter

- Engineered frontend modules for Loftx.ai, a large-scale property management SaaS — delivering 6+ dashboard feature areas using React Query & Redux, reducing client-reported UI bugs by standardising component patterns across the codebase.
- Built the complete Kaaspay Admin Dashboard independently — covering user management, payout workflows, and real-time transaction monitoring for a fintech platform processing high-volume financial operations.
- Contributed to the Tata Consumer Products Appraisal Management System, integrating AWS Lambda-backed APIs with a React frontend to automate employee appraisal workflows previously handled via spreadsheets.
- Delivered 3+ freelance production ecosystems (mobile + web + backend + admin) alongside full-time employment — scoped, built, and deployed solo with zero external engineering support.

Featured Projects

HOTO Offers Ecosystem *Flutter · React.js · Next.js · Node.js · MongoDB*

- Sole developer of a 4-product ecosystem: customer mobile app, vendor mobile app, React admin dashboard, and Next.js marketing website — all live and maintained in production.
- Architected multi-role onboarding flows and vendor management systems; deployed both Flutter apps to Google Play Store and managed releases through full app lifecycle.
- Designed and built the Node.js/MongoDB backend handling all business logic, offer management, and analytics pipelines serving real users.

Doctor Appointment Booking Platform *Next.js · Node.js · MongoDB · Razorpay · WhatsApp API*

- Built a healthcare platform with dynamic slot allocation across 20+ configurable time windows, cutting scheduling conflicts to zero.
- Integrated Razorpay for payments + automated refunds, and WhatsApp Cloud API for instant appointment confirmations — reducing no-shows through real-time notifications.
- Delivered a full admin dashboard with appointment control, refund management, and multilingual content CMS.

WolfKart E-Commerce Platform *React.js · Node.js · MongoDB · Payment Integration*

- Built a full-stack e-commerce platform from scratch — product catalogue, cart, JWT authentication, admin dashboard, and Razorpay checkout — shipped as a solo project in production.

Dubai Interior Design Website *Next.js · Tailwind CSS · Framer Motion*

- Developed a premium animated business website for a Dubai-based interior firm; achieved high Lighthouse performance scores through optimised asset loading and animation strategies.

Additional Projects

- Airbnb-style Guest Booking App with separate host and admin dashboards — built with Next.js & MongoDB.
- Task Management Platform (Next.js + MongoDB) with multi-user workspaces and real-time status tracking.

Education

B.Sc. (Hons) Agriculture

Uttaranchal University, Dehradun
